NOT INFALLIBLE. Mr. ELBRIDGE T. GERRY thinks himsel

and his Bureauerats infallible. In his protest against the passage of Tru EVENINO WORLD'S Children's Bill he indulges in this breezy bit of egotism : "The directors of these institutions are the only proper and impartial persons competent to judge whether or no the welfare of a child demands its removal from the custody of its parents."

THE EVENING WOLLD cheerfully concedes the great good that these institutions are capable of doing, but it maintains, and has produced indubitable proof to sustain its position, that they are also capable of cruel in-

It is human to err. It is inhuman not to provide a remedy for the error.

It is a fundamental principle of law that every wrong should have its remedy, but Mr. GERRY would have his charity conducted in opposition to this principle.

Notwithstanding the infallibility arrogated to himself by Mr. GERRY, the lawmakers are likely to have confidence in the impartiality of the judgment of the Judges of the Supreme Court as to the sufficiency of the proofs of the propriety of separating children from their parents in contested cases.

In this view we are supported by an overwhelming public sentiment, which nerves us for the stubborn struggle with the Bureau-

WHY?

Why should not the wishes of the amusement-loving portion of the people of this city be acceded to with reference to the preservation of the Polo Grounds for the coming season?

Who is clamoring for the street improve ment which would abolish the Pelo Grounds? There is no solid phalanx of adjoining property-owners moving in the matter. On the contrary, they are divided in their views.

In favor of the delay for the present season in opening One Hundred and Eleventh street there is wonderful unanimity among the hundreds of thousands who admire the National game.

They are certainly worthy of some consideration. What advantage would accrue to the city by hurrying the proposed street walk. grading? None. In fact it would be unwise and extravagant to do the grading at present. No application has been made for sewers in Counties in the Tenth Get New Headquarthat street, and there will be none until after the close of the baseball season. Until the sewers are provided for all work upon the streets would be a useless waste of money, as ters at the corner of Fifth street and Second the work would have to be done over when the sewers are built.

Save the Polo Grounds this year, Messrs, Aldermen. By so doing the interests of the city will be best served and almost everybody

APRIL FOOL'S DAY.

Gentle reader, be on your guard to-day. You cannot be dead sure of the reality of anything you see or hear, for the practical joker is on the rampage. It is Fools' Day, and it is perfectly legitimata for your wife to salt your coffee, the chambermaid to place hairs in your bed, your most trusted friend to prove false, and the festive small boy to pin all sorts of placards on your coattail.

If you receive messages of a startling nature, don't be gulled. If you are asked to meet a friend in some place several miles distant, don't go. If Baruum's wild animals are reported to have broken loose and to be charging down the street, don't be scared. This is the one day in all the year when deception is allowable, even in the truly good, and the opportunity is improved. Don't be fooled!

Judge Remey Believes He Did All in His Power at Samoa. ISPECIAL TO THE EVENING WOBLD, I WASHINGTON, D. C., April 1 .- Judge Advocate General Remey, of the Navy, whose duty it will be to fix the responsibility for the loss of the Trenton and Vandalia, says he feels sure that Admiral Kimberby did everything in his power to protect the lives of his men and insure the safety of his ships.

"I have," said Judge Remey, "served on the same ship with him, and know him thor-oughly. I think it will be found that the Admiral did everything that was possible and that the calamity could not have been preented."
Later advices from Samoa, by way of Auckland, say that the hurricane descended upon the Apian harbor most unexpectedly and that the big German ship Eber was drag-

TO CONQUER STORM KING. English Tourists by the Alaska Expected to Cut a Path Up the Mountain.

Old Storm King, the mountain guarding

the entrance to the Highlands, looks as grand

and wild as when Hendrick Hudson first saw the bold promontory from the deck of the Half Moon.
A despatch from Newburg says that tourists are expected there from England to build a path up the side of the mountain and a look-out on its summit. This lookout would be about 1,500 feet above the river and would command a wide and picturesque landscape.

These romantic tourists were said to be passengers on the Alaska, of the Guion line, which arrived this morning. If they were on board they did not confide their plans to

the officers and crew, and no one from the captain to the bo'sn's mate could tell whither they had gone.

The Alaska carried 238 cabin passengers and 604 passengers in the steerage. She on-countered head winds and high waves all the
